

DUOLITH® SD1

Shock wave treatment for urological pain therapy
and erectile dysfunction

Shock wave treatment for urological pain therapy and erectile dysfunction

DUOLITH® SD1 is an effective and long-term treatment for Chronic Pelvic Pain Syndrome (CPPS), Induratio Penis Plastica (IPP) and Erectile Dysfunction (ED) of vascular origin. Scientific studies have proven the effectiveness of focused shock waves for these indications.

The effectiveness of this modern shock wave equipment is determined by the individually selectable, dynamic and powerful energy range and the therapeutic depth of focus that can be chosen. Deep-lying areas can be treated easily, with large focus zone making it easy to access these areas with a high degree of accuracy.

Urological pain therapy

CPPS

Significant improvement of

- ▶ Pain
- ▶ Urination conditions
- ▶ Erectile function

IPP

Significant improvement of

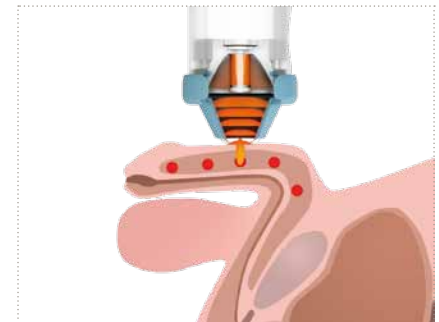

- ▶ Pain

Stabilisation in advancement of

- ▶ Penis curvature
- ▶ Plaque formation

Penile revascularization therapy

ED

Significant improvement of

- ▶ Sexual function

Advantages

- ▶ Outpatient therapies
- ▶ Therapies without medication or surgery
- ▶ Short treatment sessions
- ▶ No side-effects
- ▶ No anaesthesia required
- ▶ Can be easily repeated
